mishra2318.github.io/Personal-Portfolio/

As a passionate Backend Developer with a strong technical aptitude, I embarked on my coding journey at the age of 21. Over the past three years, I have diligently expanded my expertise. Throughout my college experience, I dedicated myself to numerous projects and technologies, rigorously refining my skills from the ground up.

WORK EXPERIENCE

Software Developer Green Apex Solution Pvt Ltd

11/2023 - Present

Ahmedabad, INDIA

Green Apex is a custom mobile and web app development company that offers high-rated solutions to startups, and enterprises across the globe.

GA-SSO Website Project:

- **Objective:** Deliver the GA-SSO application by the assigned release date.
- **Role:** Junior Developer, working collaboratively with a Senior Developer.
- **Responsibilities and Achievements:**
 - Successfully contributed to the development and timely delivery of the GA-SSO application, ensuring all functionalities met the required specifications. Actively participated in the full project lifecycle, from initial planning and development to testing and deployment. Overcame multiple challenges, including debugging complex issues and optimizing performance, demonstrating problem-solving skills and perseverance.
- **Project Info:**
 - This project aims to provide One-Click Sign-In functionality for users across multiple applications. Users don't need to enter their password repeatedly; they can access various applications internally. The login functionality is implemented with the help of Microsoft. The login process uses token exchange functionality between Microsoft and Key cloak. Admins can create, update, and delete applications for users. Additionally, functionality was added to classify applications as public, private, or restricted to only certain users within the organization.

PROJECTS

GA-TMS Project (05/2024 - Present)

- Actively participated in the full project lifecycle, from initial planning and development to testing and deployment. Worked on Allocation, Bucket, Leave, Project, Timesheet, Holiday Module.

XPRO (07/2024 - 07/2024)

- This is a CMS-based application. My task was to work on the login, registration, and ticket booking modules. I actively completed my tasks on time. In this project, I learned how booking management works internally.

Shared Cab Application(Backend) (11/2023 - 01/2024)

- This project is made during my training period. I had delivered my modules like Fare Pricing, ride booking on time, vehicle management module and make sure to fulfill all the requirements as per TL.
